Dear Tee Chuanromanee,

Your paper - Understanding Gender Transition Tracking Habits and Technology (#5484) - for the 2023 ACM Conference on Human Factors in Computing Systems (CHI 2023) has been conditionally accepted for presentation and publication as part of the conference. All accepted papers are CONDITIONALLY accepted and subject to final approval after publication ready deadline.

CHI'23 received 3,182 complete submissions and 1,554 were given a chance to revise & resubmit after the first round (no papers were accepted in the first round). The papers committee accepted 880 papers (28.39%) in total after the revise and resubmit process, which is 59.46% of all resubmitted papers (1,479 - 75 did not resubmit).

The reviews will be sent early next week after being finalised, checked, and processed, and from that point you will be able to begin your next steps. You can view instructions for completing your final camera-ready submission on the CHI'23 website:

<https://chi2023.acm.org/for-authors/publication-ready-author-instructions/>.

The main deadline for the camera-ready deadline is Thursday February 16, 2023 on which you must have completed all steps of the publications process. No changes of any kind to the publication ready submission will be allowed after this date. Any changes required after this date will need to go through the process described in the ACM Policy on the Withdrawal, Correction, Retraction, and Removal of Works from ACM Publications and ACM DL: <https://www.acm.org/publications/policies/retraction-policy>.

More information about video presentations, registering, and the conference will come in the email that contains reviews early next week. Congratulations again.

Stefanie Mueller, Julie Williamson, Max L. Wilson  
CHI'23 Papers Chairs
